

TRAUMA ARM TASK TRAINER

Trauma Arm Task Trainer

The **Trauma Arm Task Trainer** is a highly realistic, life-size simulator meticulously designed for practicing hemorrhage control techniques.

Representing an injured arm with laceration, bullet entry, and bullet exit wounds, the **Trauma Arm Task Trainer** features a bleeding system that enables the flow of blood from the wounds. You can apply direct pressure, pack the wounds with gauze, place a pressure dressing, and apply a tourniquet to really stop the bleeding.

Made with a soft silicone coating, the **Trauma Arm Task Trainer** mimics the feeling of touching human skin.

As with all other MEDICAL-X simulators, the **Trauma Arm Task Trainer** seamlessly integrates with the HEMORRHAGE-X*, ensuring a versatile and comprehensive training experience.

*Read more about the HEMORRHAGE-X on page 04

Design Philosophy: Realism in Form and Function

Realism in every detail

Our unique silicone skin feels soft and smooth, closely mimicking the texture of real human skin. Internal materials replicate muscle resistance, enabling realistic practice of pressure application and tourniquet placement.

Length: 74cm

Diameter: 9.8cm

Weight: 4.3kg

Skin tone:  Dark  Medium  Light

Realistic Bleeding:

The **Trauma Arm Task Trainer** features three inputs for each wound's individual blood flow.

Ideal for Stop The Bleed training programs and hemorrhage control:

- Wound packing with gauze
- Direct pressure techniques
- Pressure dressing placement
- Tourniquet application

Compatible with HEMORRHAGE-X

The **Trauma Arm Task Trainer** features three wounds connected to individual tubes to deliver realistic bleeding. You can pump simulated blood through the wounds using a squeeze bottle or elevate the authenticity of the training by using our bleeding simulation pump, **HEMORRHAGE-X**.

Portable and easy to use, **HEMORRHAGE-X** is available in two different models: **HEMORRHAGE-X1**, with one output; and **HEMORRHAGE-X3**, with three outputs.

Product Code: HX0001 Product Code: HX0003

The tutor can control several bleeding parameters using a smartphone, tablet, or laptop with the HEMORRHAGE-X App. When using the **HEMORRHAGE-X1**, a device's direct control is also available.

- Arterial and venous bleeding
- Regulate the bleeding flow and the pulse rate
- Sensors detect pressure applied
- One or three outputs with independent flows
- Remote control by a web application

*The HEMORRHAGE-X is available as an optional add-on and can be purchased separately.

Technical Specifications

Life-size model of a human arm
Realistic weight and size: 4.3kg and 74cm
Smooth and soft silicone skin
Representation of laceration, bullet entry, and bullet exit wounds
Individual wound bleeding control system
Ideal for Stop the Bleed training programs
Compatible with tourniquet application
Compatible with HEMORRHAGE-X
Durable and resistant skin
Easy to clean and disinfect
Latex-free

*Specifications may be subject to change during development.

Please contact MEDICAL-X for the latest specifications.

Warranty

This product is covered by a 2-year warranty against manufacturing defects. If a defect occurs within this period, MEDICAL-X will repair or replace the defective item at no additional cost. For warranty claims, proof of purchase and detailed documentation of the defect are required. Please contact our customer support team for assistance.

Disclaimer

The warranty does not cover damages resulting from misuse, improper handling, or unauthorized modifications. The warranty does not include normal wear and tear, including discoloration or material degradation due to repeated use. MEDICAL-X assumes no liability for improper usage or failure to follow the product's instructions.

MEDICAL-X
BRINGING SIMULATION

About MEDICAL-X

MEDICAL-X is a Dutch company specialized in the design, development, manufacturing, marketing and distribution of simulation products for medical teaching and training.

Our mission is to provide healthcare professionals with simulation-based training solutions and cutting-edge technological simulators that are cost-effective and time-efficient to teach and train clinical skills without risk to actual human patients.

Design philosophy

Realism is the key to our design philosophy! Simulator training gives medical teams the experience, competence, and confidence they desire. Realism adds to the quality and efficacy of training.

Our products are developed through extensive feedback programs to produce an engaging experience for healthcare professionals. Form and function come together in a realistic and interactive simulator, ready to be used in training for all levels of care.
